Only 1% of students receiving special education services in the United States have a primary eligibility of Deaf or Hard of Hearing (DHH). It's no wonder school districts may feel unprepared to face the unique educational and technological challenges associated with these students!

EARS LLC can help!

EARS LLC provides the following services:

- Consultation regarding Hearing Assistive Technology (HAT)/FM systems for the purpose of recommending and fitting of new equipment
- Consultation regarding hearing-related IEP goals and accommodations
- Complete equipment oversight including detailed inventory and ongoing maintenance
- Equipment troubleshooting of HAT equipment or personal hearing device equipment
- Teacher in-services and trainings
- Earmold impressions and ordering/fitting of new earmolds
- Audiological evaluations in a sound booth:
 - Full diagnostic hearing evaluations for students with known hearing loss as well as students who have not passed a mandated school screening
 - Evaluations of performance in noise, to assist in determining potential benefit of Hearing Assistive Technology (HAT)/FM systems
- In-depth hearing screenings on-site at your location, including tympanometry and oto-acoustic emissions screenings
- Oversight and/or administration of state-mandated hearing screenings
-and more, depending on the needs of your students and staff!

Contact EARS LLC today to discuss how Dr. Gallien can help you provide the best services for your students who are Deaf or Hard of Hearing!
